

MovilizerTM
Mobilize it Yourself!

Training course agenda:

Mobilize it yourself at the

Movilizer Standard Training Course!

With the Movilizer Mobile Enterprise Application Platform on the cloud (MEAP on the cloud) you can build any mobile app for your blue collar workers (B2B apps for "blue-collar"), white collar workers (B2B apps for "white-collar") or even mobile apps for your business partners, customers or prospects (B2C apps) on a single platform. The Movilizer Team offers you a five day training course where you can learn how to mobilize any process you can think of. The goal of the training is to show you the range of possibilities you have in developing apps with the Movilizer. The training is held in English by Movilizer developers, which means: **You learn from the experts!**

If you are interested please sign up at www.movilizer.com/standard-training-course

The training course will take place at the Movilizer headquarters in the Technology Centre Mafinex in Mannheim.

The objective of the training is to enable you to Mobilize it Yourself. This is achieved by having a lot of practical exercises like developing with the Movilizer Expression Language or creating Movilizer applications from within a SAP System (development language is ABAP).

Attendees should fulfill at least the following requirements:

- basic programming skills in XML and a programming language of your choice
- ABAP skills (if Movilizer integration into SAP is relevant for you)

AGENDA:

1st Day

- Introduction to the Movilizer
(General Overview and Concepts)
- Movelets – The Mobile Process Definitions
- **Exercise:** Setup of Users and System Access
- Movilizer Portal Concepts - Developing, Designing, Publishing and Using Mobile Apps
